

Radiologic Sciences Marker Ordering

All Radiologic Science students must obtain markers for clinical use. They are used to identify the images you create for every view of an exam. You are expected to obtain a Right and Left marker with your initials and stainless steel ball position indicator.

Please visit: <https://shop.pbmarker.com>

Step 1: click on markers at the top of the home page

Step 2: click on 3 Initials or Numbers (right column 3rd down)

Step 3: click on 2A

Step 4: Complete the marked fields to the right of the sample image. When completing this step, "Marker A" will be the right, "Color A" will be red – the 10th selection on the list. "Marker B" will be left, "Color B" will be blue – the 15th selection on the list.

Fill in all other field accordingly.

These will become your main markers and must be with you for clinical rotations. If you lose a marker, you must replace it immediately.

Your marker is a legal component of the imaging process. If you do not have your markers, you are unable to fulfill your student responsibility and unable to attend your clinical rotation.
