

VERMONT TECH

Construction Management Program

Recommended Computer

Computers are the toolbox of Construction Managers. Due to our emphasis on mobility, cooperative projects, and paperless construction management, we recommend a laptop or notebook PC. Software, including Microsoft Office, Bluebeam, and AutoCAD are available to students for little or no cost after they arrive on campus. Electronic copies of textbooks and materials are available to help reduce textbook costs.

Software provided by the Construction Management Department is not available for Apple products.

Minimum specification; 64-bit Windows 10 laptop with an Intel i5 Dual Core processor, wireless capability, at least 8 GB of RAM, and 64GB Hard Drive. Plan to spend about \$600 for a laptop that will serve you through graduation.

If you intend to purchase a laptop using Financial Aid or loans, please email the financial aid office to discuss your options; finaid@vtc.edu or 800.965.8790

Tool Requirements

The Construction Management program supplies all the power tools needed for labs. Each student registered in Residential Construction Lab fall term should have the following personal tools and clothing by the first week of classes:

Tool belt

Hammer

Speed or combination square

25' or 30' Tape Measure

Utility Knife

Chalk Line

Nail Set

Pencil

Steel Toe Shoes

Safety Glasses
