

Dear Accepted Student,

Congratulations on your acceptance to the Automotive Technology program at Vermont Tech! As part of this program, you are required to possess a set of tools sufficient to perform your lab responsibilities and your work duties during the internship experience.

Attached you will find a list of the tools that you are required to purchase before classes begin. Tool storage is another issue that raises a lot of questions from students. We require that you possess a roll cab or tool cart to hold all of your tools. The size specification is listed on the attached tool list. One issue I wanted to draw to your attention is that if you purchase this roll cab from Snap-on tools, you will not be allowed to purchase another one at the discounted price ever again. My suggestion is for you to purchase your tool storage from another company.

Lastly, you must wear black jeans or work pants and safety toe leather boots/shoes during all labs, or any time you are working in the lab facility. We will provide you with black Vermont Tech Auto Tech t-shirts to wear during the labs, as well.

Generally, students will have three labs per week, therefore I suggest purchasing three pairs of pants and we will provide you with three shirts. Cleanliness is a must! Please feel free to contact me with any questions about the tools, storage, clothing or the program in general.

Thank you for choosing Vermont Tech and I look forward to seeing you in the fall.

Sincerely,

*John W Wheeler (Will)*
