PRESIDENT’S MESSAGE

Vermont Technical College has an honorable history of being at the forefront of the educational needs of Vermonters. More than 200 years ago, in 1806, the school that would later become our college, was founded on a hill in Randolph by a group of forward-thinking individuals.

As I sit in my office in Randolph, looking out at that very same landscape, I see an incredible future, informed and inspired by our college’s spirited past. As we continue our transformation to Vermont State University, we have much to be proud of, and so much to bring to this new vision for higher education in Vermont.

- » **RETURN ON INVESTMENT.** This year, we ranked first in the state and #7 nationally among four-year public universities with the best short-term net value, according to a report from Georgetown University’s Center on Education and the Workforce, which ranked 4,500 colleges and universities across the country. The ranking speaks to our prowess in preparing career-ready students.
- » **STUDENT SUCCESS AND JOB PLACEMENT.** Our students continue to achieve and accomplish – in 2022, we saw our students maintain a 99% job placement rate within six months of graduation, and we also continue to have the highest-earning graduates of any Vermont college. Many of our students go on to answer the workforce needs of our state, serving in critical occupations.
- » **NEXT-GENERATION MANUFACTURING.** Our new Advanced Manufacturing Center formally opened in a celebration headlined by Senator Patrick Leahy, who was instrumental in the funding and founding of the center. The AMC provides our students with the incredible opportunity to develop, design, manufacture, post-process, and engage in quality assurance with faculty and work in partnership with local businesses doing prototypes, small-batch manufacturing, and product testing. The future of manufacturing is in Randolph, Vermont!

» **THE FUTURE OF AGRICULTURAL EDUCATION.** Speaking of the future, this year we introduced a new vision that builds on our 120-year history of agricultural education. Our new Center for Agriculture & Food Entrepreneurship, slated to open in 2024, will expand educational opportunities in a variety of modalities and in a range of fields of study, including new concentrations in diversified livestock, regenerative farming, brewing, meat curing, food entrepreneurship, and other value-added produce. We will offer an Associate Degree in Agriculture & Food Entrepreneurship, and students may choose to go on to complete a bachelor’s degree in either Diversified Agriculture or another degree offered at Vermont State University. We look forward to remaining a vital force for educating and training the next generation of bright, innovative farmers, food workers, and food entrepreneurs.

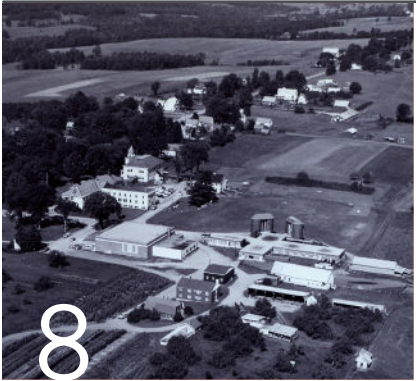

There are many ways in which our faculty, staff, and students strived and thrived in 2022. We are impressed by their resilience and celebrate their accomplishments. To alumni, we say, our hats off to you on your numerous successes and positive contributions to society. You are integral to our history as an institution, and you make your alma mater look so good.

I’m inspired by how our community has risen to the challenge of transformation by bringing the best of what we can do together to the table. Our Randolph Center and Williston campuses and our learning sites will drum to the beat of the heart of Vermont as they always have and continue Vermont Technical College’s legacy of educational leadership in our state as part of Vermont State University.

I look forward to building our future with you.

Yours,

Michael K. Smith
Interim President

Thank you for making a gift and supporting VTC!

Welcome!

Welcome our Assistant Vice President of Institutional Advancement and Alumni Relations for Vermont State University – Lauren Philie!

Lauren Philie has been with the Vermont State Colleges System for almost 12 years. She started as the Director of Development and Alumni Relations at Johnson State College, headed the alumni and development department at Northern Vermont University, and now serves as the lead of the Institutional Advancement Team for Vermont State University.

You may have already seen her name and messages in some of our Vermont Tech Alumni E-Newsletters, as she is now working with alumni from all of the Vermont State University campuses.

Lauren shares, “I am looking forward to meeting as many of you as possible, to hearing about your experience both as a VTC student and as an alum, and to working with my team to create a great experience for our Vermont State alumni! This includes offering you an expanded slate of alumni benefits, an exciting variety of alumni gatherings and networking events, increased volunteer and giving opportunities, and regular communications from our office. Please feel free to contact me anytime at 802-635-1657 or Lauren.Philie@VermontState.edu. Thank you for continuing to support your alma mater!”

Congratulations
Class of '72 as
we celebrated
your 50th
reunion this
year!

This year's Homecoming/Alumni Day was one to remember! Not only was it our last Homecoming under the Vermont Tech name, but we also had one of our **largest 50th-year class reunions with twenty-three 1972 alumni** at the Randolph Center campus! **Robert Ide, AG '72**, won the September Alumni of the Quarter Winner for helping send a letter to his classmates and rally everyone together for this special day! (See the Alumni Profiles on our website to learn more or scan the QR code on page 15).

We had some new events added to this year's Homecoming, including a Silent Auction, a Carnival Booth run by a current Vermont Tech student, and Yearbook/Old Dorm poster selling in the Hartness Library. Thank you to everyone who participated in these activities as all the alumni, family, and friends who contributed helped raise \$600 for the Alumni Association fund that supports Vermont Tech's alumni community!

Everyone also enjoyed some of our classic activities like apple picking, Advanced Manufacturing Center tours, the varsity men's and women's soccer games, and the famous alumni turkey meal in Morey Dining Hall. In addition, **David Silloway, AG '66**, came again this year to offer hayrides with his tractor!

ATHLETIC INDUCTEES L-R: ROBBY COSGRIFF, JUSTIN NEWLAND, JAMAL HUGHES, PHIL HEPBURN, WILLIAM FIELD, MARYBETH LAROCQUE, CHAD ALBRECHT, LANCE BOIRE.

Vermont Technical College's Athletic Department hosted its **inaugural Athletic Hall of Fame** event in conjunction with the college's annual Homecoming weekend.

"We want to ensure that Vermont Tech's athletics legacy is retained in a formal manner," said Hilary Linehan, Director of Athletics and Recreation at the college. "The athletes inaugurated into this first Hall of Fame class showed exceptional talent and willingness to work hard both in the classroom and on the playing surface."

Athletics have a long history at Vermont Tech, dating back to the 1960s. The athletic teams started as part of the NJCAA, competing with some schools within the same athletic conference for more than 50 years. After the college added its first bachelor's degree program in Architectural Engineering Technology in 1993, Vermont Tech moved over to the U.S. Small College Athletic Association, which rebranded as the United States Collegiate Athletic Association (USCAA) in 2005.

Vermont Tech has a history of excellence in athletics, with hundreds of student-athletes earning national and conference All-Academic, All-Conference and All-American awards. Our teams have also followed this pattern of excellence, appearing in over **50 different Conference and National Championship tournaments and events, and winning nine of these.**

"While we honor this year's class of athletes, we know there are more out there that will be nominated for a future class," Linehan said. "We expect to open nominations with Homecoming registration this year so please be sure to check the website to place your nomination."

The Hall of Fame Kiosk is located in the alcove next to the SHAPE entrance on the Randolph campus. Visitors may view the Hall of Fame online by using the Hall of Fame link on the Vermont Tech athletic website under "Inside Athletics".

ALUMNI ASSOCIATION

To make sure we preserve Vermont Tech’s history, ideals, and community going forward as Vermont State University, we will have **separate Alumni Associations at each institution**.

The Vermont Tech Alumni Association is a group that helps build and maintain alumni connections and community; speaks to the mission and goals of the College; manages the Alumni Association funds, and more. It is a group of Vermont Tech alumni that come together to help support not only the College you have come to know and love, but the future graduates of the institution!

Every Vermont Tech Alumni is part of the Alumni Association. Anyone is welcome to all events, meetings, and voting decisions made for the association. The Alumni Association Board are Vermont Tech alumni that are appointed by the association to provide structure and management of the association. Currently, we have **15 active members** of the association, meeting together, to help rebuild our Vermont Tech Alumni Association and vote for Board Members.

Meet the Vermont Tech Alumni Association Members!

Check out the listing at right of the current Alumni Association Members. This group is meeting together virtually, so anyone can join, to help create the Alumni Association Board.

The next meeting will be shared in the next E-Newsletter – so make sure we have your most updated email address!

If you would like to be involved please contact:

We at Vermont Tech are excited to make the final transition to Vermont State University on July 1, 2023. That means as we unify together with Castleton University and Northern Vermont University, so will our events! Although some will be celebrated on separate campuses, like Homecoming Weekend and Annual Golf Tournaments - **all alumni, from all institutions, are welcome to join!**

For last year's 7th Annual Knights Scramble golf tournament we want to thank **PC Construction** for being our Knight Sponsor, **The Tech Group** for being our Squire Sponsor, and **SymQuest** for being our Sword Sponsor! We look forward to this year's 8th annual event - and registration is open on our alumni events website at vtc.edu/alumni-events/

***Important note:**
Not all alumni events are listed below. Any additional, pop-up events will be sent via email and social media, so please make sure you **Update Your Information** at the link below or follow our VTC Alumni Facebook page to get current updates!

2023 ALUMNI EVENTS

DATE	EVENT	LOCATION	TIME	INFO
May 12	Alan Curler Memorial Cruise	Spirit of Ethan Allen, Burlington	6–9 pm	Lake Champlain cruise, dinner, and DJ. Register at VermontState.edu/alumnicruise
May 14	Vermont Tech Commencement	Randolph Center Campus	3 pm	Can you volunteer? Email us!
July 13	Knights Scramble Golf Tournament	Montague Golf Course, Randolph	9 am Shotgun Start	Play a round of golf and support VTC's Athletic Dept.
September 23	Homecoming Weekend	Randolph Center Campus	Afternoon & Evening	Alumni Day with fall activities

VERMONT TECH

Orange County Grammar School was founded here on our hill in Randolph Center. Mr. William Nutting was its principal and is the namesake of one of Vermont Tech's residence halls. These were the first steps in our history of educating the citizens of Vermont.

1806

1866

The Randolph Normal School was founded.

After 60 years at the Grammar School, this location was chosen to become the state's first normal school for the purpose of educating teachers, again by legislative mandate.

The Randolph Normal School's first principal was Edward Conant, whom an academic building is named after.

President Edward Conant
1867-1874; 1884-1903

1879

President
Andrew W. Edson
1879-1884

President
Abel E. Leavenworth
1874-1879

1874

President
Charles Morrill
1903-1911

1903

1907

Thompson School of Nursing in Brattleboro was established.

1912

VSA dairy barn built (mostly constructed by students).

VSA wood shop building and forge created from the annex of the Maplewood/VSA dormitory.

1910

President G. Leland Green
1911-1918; 1919-1920

1918

VSA community and students construct the dormitory building (better known as Old Dorm).

1946

The last class to complete the one-year wartime course of instruction 63 Males students enrolled and 11 WWII veterans enrolled.

1957

President Richard A. Young
1957-1962

1962

It was not long after the industrial revolution that led to VATI that **Vermont Technical College was founded**. In 1962, the college was authorized to grant degrees of Associate in Applied Science. Morrill Hall (named in memory of U.S. Senator Justin Morrill from Vermont, author of the Morrill Land Grant Colleges Act of 1861) is completed.

1964

Morrill addition was completed, but before the classroom building was raised.

President
Pierre V. Kieffer Jr.
1964-1975

1966

Conant Hall (named in memory of Edward Conant) is completed and housing classes and administrative offices.

Morey Hall Dormitory (named in honor of Captain Samuel Morey, an early Vermont inventor) is completed.

1963

First women were accepted into VTC.

1965

The Associate of Engineering degree was first granted in 1965.

1967

Farm complex completed and Orchard property purchased.

1970

Veterinary Technician Lab was completed.

President
Robert G. Clarke
1984-1999

1984

1980

President
James P. Todd
1980-1984

1989

Automotive Technology Center is completed.

1975

President
Ned E. Herrin, Jr.
1975-1980

In response to evolving educational needs of Vermont's workforce, technical courses were added to the offerings of the school in 1957 and the institution was given a new name reflecting this expanding mission: **Vermont Agricultural and Technical Institute (VATI)**. It was the first and only technical institute in Vermont, with an initial enrollment of approximately 75 students. It was then that we educated not only the farmers, but the highway engineers and electrical engineers for Vermont's growing industrial production.

Celebrating

Green Hall (named for Leland G. Green, first principal of VSA) is built.

Nutting Hall (named for William Nutting, first principal of OCGS) is built.

Our History

Continued...

A short time later in 1994, the nursing programs, Fanny Allen School in Colchester, Putnam School in Bennington & Thompson School in Brattleboro, were added to the College community.

Even today, Vermont Tech's Practical Nursing program is the longest running of its kind in the country.

Williston campus became an official Vermont Tech campus for all students.

RN Program received national accreditation.

Randolph nursing simulation lab opened.

President Ty J. Handy 2006-2010

Nursing distance sites in the Northeast Kingdom Region started. The Newport, Morrisville and Lyndon sites were added to one that already existed in White River Junction.

By 2015, Vermont Tech was authorized to award its first master's degree in software engineering.

First students graduated from the online nursing programs and the Online RN and BSN nursing program was accredited. And Dartmouth-Hitchcock site opens.

July 1, 2023: Vermont Tech unifies with Castleton University, and Northern Vermont University to become Vermont State University

2023

Vermont State University

1994

2003

2006

2009

2013

2015

2018

2020

1990

Student Health and Physical Education (SHAPE) Center is completed.

2000

Bachelor of Science in Computer Engineering Technology in fall of 2000.

President Allan S. Rodgers 2000-2010

2007

Bachelor degrees in Dental Hygiene, Equine Studies, and Sustainable Design and Technology were offered.

The Student Center portion of SHAPE was added and completed.

2011

President Philip A. Conroy 2011-2014

2012

Professional Pilot Technology program was established at Williston Campus. (learn more about this program on page 20 & 21)

2014

President Daniel Paul Smith 2014-2016

2016

First Women President of Vermont Technical College: Patricia L. Moulton 2016-2022

2019

Rutland Nursing distance site opens.

2022

Lyndon simulation lab opened.

1993

College was approved to award its first bachelor's degree program, the Bachelor of Science in Architectural Engineering Technology

Late 1990s

An Associate Degree (RN) program was added, and by 1999 two cohorts had already graduated.

2005

Offered Bachelor of Science in either Software Engineering or Information Technology

RANDOLPH CAMPUS THROUGH THE YEARS

SHARE YOUR STORIES

Thomas “Tom” Roughton, AG '46 Growing up in New York City, Tom moved to Vermont to help on a farm and stayed for eight years. Once he graduated from high school he went to Vermont Tech (known then as Vermont School of Agriculture [VSA]) because of his interest in farming. He noted a memory of working on the farm at Vermont Tech stating, “It was a great school for me. Part of our tuition was putting in so many hours of work per year and if you worked more, they would pay you \$3.00 per hour, if I remember. I used to run the dairy room in the milking barn and it was a morning and night job. My job was to sanitize and keep it clean. I think I paid most of my own tuition just working on the farm at VSA.” After graduation, he had a job lined up in Minnesota working for a milking machine company. Later, he worked for John Deere and became a Construction Equipment Dealer for 20 years and was the President of the Equipment Dealers Association. Afterward, he moved to Wisconsin and raised beef cattle for 40 years and then moved to organic chickens up until last year. Now he is residing anywhere to stay close to family. Tom also attended the 2022 Homecoming Weekend (pictured on page 3) and represented the oldest graduating class, celebrating 77 years!

James “Jim” Hoyt, AG '50 Jim lived on campus in Old Dorm and was involved in baseball and basketball. Currently, he’s a Division Sales Manager at John Deere where he has worked for 35 years!

Gene Sargent, HT '59 After being honorably discharged from the Korean War, Gene came to Vermont Tech per his father’s suggestion. He noted, “Calculators were just coming out then!” He also disclosed that Vermont Tech was a great school and shared, “I lived on campus and there were always guys trying to crazy things!” Once he graduated, he used his degree right away and helped to build highways through the State Highway Department. He worked there for almost 20 years as a Head Inspector. Then Gene started his own real estate business and helped run it with his wife and his two daughters in Chelsea, VT. Now, Gene is happily retired and enjoying his home.

Louis L. Hall, AG '65 Louis came to Vermont Tech to pursue an education in Agriculture, as he is part of a 5th generation dairy farm called Whey Run Farm in Orwell, VT. He was also involved as a Fire Chief for 39 years and had been part of the department for 53 years. Now retired, Louis is still farming with his family.

John E. Hunter, MEC '65 “During the 1965 senior recruiting phase at VTC, I was hired by Jones and Lamson Machine Company of Springfield, VT. There were five of us hired out of VTC at that time, three Mechanical and two Electrical techs. I was the only one left from that group when they closed their doors in 1986. I was able to work my way through the ranks doing mechanical machine design, starting as a draftsman, and working for both the grinder product line and the lathe product line (even getting involved with some early robotics cells in the 70’s) working up thru Senior Design Engineer, before ending up as a Lead Man for the Lathe Engineering group. That position entailed reviewing all the incoming machine orders for our department and working with the Engineering Manager to choose which staff members would get certain jobs. I was fortunate enough to use my VTC training during my whole career, even after J&L closed. My wife and I are now retired in North Springfield; have three children, and six grandchildren.” Learn more about John, and his profession, on his blog: jandlengineer.wordpress.com.

Warren N. Vincentz, CET '68 Warren lived in Old Dorm and was part of the Yearbook Club while attending Vermont Tech. Now, he is retired from 33 years as a Resident Engineer and lives in New Jersey.

Robert “Bob” Boisvert EM '71 Back when Bob was attending Vermont Tech, he lived in Old Dorm and was part of the Radio-Controlled Model Club. Now, he has retired from 35 years of service at IBM as a Senior Service Planner.

Winston Chambers, CET '72 Taking a drafting class in high school, led to Winston’s interest in Civil Engineering. He chose Vermont Tech because of the degree option and right after he

graduated, he obtained a job at Dufrane Henry Engineering in Springfield, VT where he worked for 18.5 years! He stated, “I used my degree as it helped with overseeing sewer and water projects.” Then Winston worked at Dartmouth College for 27 years as a Construction Manager and his favorite part was, “everything...because it was interesting meeting new people, and building and coordinating projects from all over the country.” Winston stated, “I highly recommend Vermont Tech...excellent job placement and teaching.” Now, Winston is retired and came to the 2022 Homecoming/Alumni Day on September 24th for his 50th reunion!

Rene Roy, EET '72 Rene shared, “I enrolled in the Pre-Engineering program in 1969 with no loss of credits from the GI Bill. I lived in the Old Dorm for one year with my roommate Peter Kane. We commuted back and forth from Island Pond on the weekends. To lower college costs, I was a dorm counselor for one year and I worked with Perry Lanou one summer cleaning rooms. That was a good thing, as I lost twenty-five pounds that summer. I remember one weekend in the winter out of sheer boredom a couple of us from the college decided to visit New York but stayed too late. On our trip back to the college, we ran into a snow squall and drove off the road hitting a telephone pole. Without a ride, Vermont Tech Security drove to the hospital to return us back to the college. I will never forget that one act of kindness. After graduating, I worked at various companies running a gamut of various disciplines.” Now Rene is enjoying retirement.

Paul Stanley, AG '74 A message from Paul: “Hi to all at VTC and alumni! It’s been a lot of water over the dam in the last 48 years. As we approach our 50th year reunion there is much change happening at the “Tech”. This is not something like change in curriculum, this is major; from combining institutes, to selling the Dairy Herd, and moving what we teach about Ag to a whole new concept. In a fifth sense, we are going back in time where living off the land meant providing for you and the family and selling what you could in the city. The thing that does remain with us is the land; whether it has a house, trees, roads, water, land fill or open fields, it’s our land and it needs to be cared for. We can do all the educating in the world, but

Do you have news to share?

We want to hear from you for our next issue. Go to vtc.edu/alumni and click on Share Your News or email your story and photos to alumni@vtc.edu.

if we do not respect the environment, life will be very different, which we are already experiencing. Education is becoming more vital than ever to give us the different perspective on life which Vermont Tech has given to many of us. It’s not what we learned it’s the fact that we learn how to learn for life.” Paul is currently the Owner of Paul-Lin Dairy, LLC.

Susan “Sue” James, DFM '77 Sue shared, “I have just retired after 37 years of working in the Vermont Agency Agriculture Food and Markets Dairy Div. My last few years were as Supervisor of the farm inspection staff. It was interesting to meet fellow Vermont Tech Dairy graduates around the state and talk to them about their experiences at Vermont Tech. (Also, good to note that 3/4 current dairy farm specialists have Vermont Tech degrees).” Now, Sue will be spending some time catching up with some quilting, reading, and time with her horses.

Barry Alan Coffin, EET '80 Barry chose to attend Vermont Tech because of the high return on investment rate. When attending Vermont Tech, Barry resided on campus in Morey Hall. He was involved with table tennis and basketball on campus and noted that it was a great experience. He has been working at Collins Aerospace for 14 years, first as a level 1 Technician, and has moved his way up to the Senior Supervisor!

Mark Ryan, ABT '83 Mark shares his exciting news, “Since graduating from the Tech I have had many career changes. My latest has lasted over 20 years. I am the Head of Steam Plant Operations at Davidson College in Davidson, North Carolina. I will be retiring at the end of June. I plan to move on to the next phase of my career which will entail more time with family, including my wife of almost 39 years, our two grown children and their spouses, and our grandson, who was born in October. My wife and I also plan to travel more and enjoy our lakeside home on Lake Norman.”

James B. “Jim” Lehneman, MEC '84 Jim enjoyed his time at Vermont Tech and lived in Keenan, Old Dorm, and Morey while he resided on campus. He was

active and participated in baseball and cross-country skiing, stating, “I had a very positive experience at Vermont Tech. I was very lucky to have been part of the Champion NJCAA Ski Team and was the individual XC-Ski NJCAA Champion in 1983!” Now, Jim is working at the UVM Medical Center as the Director of Facilities and has celebrated his 8th year there! Jim was nominated this year into our first Vermont Tech Athletic Hall of Fame (see page 5)

Kris Merchant, EET '85 Kris is excited to announce that he has been a Sales Manager at Waitsfield and Champlain Valley Telecom since 1997, providing of 25 years of service! Find Kris on LinkedIn.

Mark Riefenhauser, CET '87 During his time at Vermont Tech, Mark lived in Morey Hall and was part of the Civil Engineering Club. Now he is using his degree at Smith & Company as a Professional Engineer and has just celebrated 20 years!

Tricia Eastwood Foster, AMT '90 Currently, Tricia is at Vermont Natural Agriculture Products as a Manager and has been there for 25 years!

Heather Lumb, ABT '92 Recently moved to South Carolina, Heather started a new job at the Medical University of South Carolina (MUSC) as the Construction Project Coordinator, and is engaged to be married in October 2022!

William L. “Bill” Gray, CET '94 When attending Vermont Tech, Bill lived in Morey and stated, “I made a lot of good friends that I still see today.” Currently, Bill is working at the Vermont Agency of Transportation as a Field Technician and celebrated his work anniversary of 25 years!

Cynthia Rhoad, LPN '94 Cynthia shared: “Since I graduated from Putnam Memorial School of Practical Nursing, I have held three significant jobs in the medical profession. I worked as a Medical Assistant at a podiatry practice where I took x-rays, did physical therapy, removed casts, and prepped patients’ feet for office surgeries. I earned an Associate’s degree in General Studies at a local community

college while I worked there, and after that I moved to Blacksburg, VA where I earned a Bachelor’s in Psychology at Virginia Tech. Then I worked the front desk at a busy internal medicine practice and attended Johns Hopkins University to receive a graduate certificate in the Business of Medicine. Then, I worked part-time for a healthcare agency as a flu nurse (administering flu shots) until I retired several years ago.”

Esther Mears-Moses, LAH '95 Esther noted, “I was a student that came in later in life. Had a child and was going to school and working. I found that most of the students no matter their age were friendly and great. The professors were very helpful!” Now, Esther is working at Vermont Country Campers and has been there for three years.

Luke R. Beauregard, CPM '01 Luke used to be involved with basketball at Vermont Tech and was part of the team that won the winning division championship. Now residing in Tennessee, Luke started his own construction company called Luke Beauregard Construction in 2017.

Laurence Dean, ABT '01 Laurence is using his degree from Vermont Tech as a Designer at the Cushman Design Group in Vermont. He currently resides in Stowe, VT.

Jessica Dawn Lothian, AET '02 While attending Vermont Tech, Jessica lived in both Keenan and Old Dorm and was involved with the AIAS club. Now, she is working at WBRC Inc. as an Architectural Design Specialist and has been there for 20 years!

Adam Eccher, ECM '03 Adam shared, “I graduated in 2003 with an Associate in Applied Science. A friend of mine and VTC alum, **Colin Parker, BUS '04 & '05**, helped me land my first job out of college at Pro-Cut International in West Lebanon, NH as a Phone Support Technician. In 2006 I was able to start my semiconductor career at Micron Technology in Manassas, VA as a Maintenance Technician. In 2012, I continued my career at Broadcom in Fort Collins, CO as a Senior Maintenance Technician. Then, in 2021 during the

VERMONT TECH

pandemic, I am now an Equipment Engineer at Skywater Technology in Bloomington, MN. I've worked with several VTC alum in the semiconductor industry and they have done very well for themselves!"

Alain LeBlanc, CET '04 Alain shared, "Vermont Tech was very influential in my career as it allowed me to find out how I liked to learn. Vermont Tech's hands-on learning approach and real-life application model was starkly different to other colleges' theoretical style." Since graduating, Alain explained, "I have used my education to further myself in the Commercial Construction Project Management field. It has allowed me to work in several states and in several different market sectors including aviation, life sciences, retail, automotive, aerospace, and warehousing." Now, Alain is the Vice President of Operations at Jewett Construction Co, LLC in Fremont, NH!

Amber Miller, VAST '04 Amber works at Aldrich Advisors + CPAs as a Senior Manager/Utility Consultant and has been there for 7.5 years! She has a professional CPA license in AK, MT, and OH. She currently resides in Alaska.

Ann Marie Russo, LPN '04 After she studied at the Vermont Tech Bennington campus, Ann is now working at the Department of Veterans Affairs as a Human Resource Specialist and has been there for 14 years!

Chad Loseby, CPE '07 & '09 At Vermont Tech, Chad lived in Morey and was involved with the WVTC Radio Club. Now, he is currently working at CSG Government Solutions as a Senior Consultant.

George A. Carpenter, CPM '10 George's time at Vermont Tech involved living in Old Dorm and being part of the Construction Club. Now he is the Vice President of JP Sicard Inc. and has been employed there for 12 years!

Andrew Faure, MEC'12 & ELM/MEC'18 Andrew is a Lead Inspector at Kamatics in Connecticut and shared that it's one of USA's biggest aerospace suppliers.

Joshua Burleson, LPN '14 Joshua lives in North Carolina and started working at JetBlue Airways as a Lead Engineer in Software.

Sarah Healey, AET '15 Sarah is excited to share that she has been working at the same company since graduating in 2015 at NHDOT (New Hampshire Department of Transportation) and is currently studying for the PE license exam! She also announced, "Also, one major change since I attended VTC: I came out! Formerly known as Matthew Thomas Healey, I go by Sarah Alexis Healey now, pronouns she/her. It's been a huge change for the better in my life, and I couldn't have imagined being able to do so without the support of my family, friends and coworkers. I look forward to being addressed as Sarah Healey, PE in the very near future!" Sarah attended 2022 Homecoming/Alumni Day and won the Scavenger Hunt getting a Vermont Tech Picnic Blanket as a prize!

Andrew Tipper, CIT '15 During his time at Vermont Tech, Andrew lived in Morey and was involved with the Humans vs. Zombies and LARPing Club. Now he is working at Marathon Health as a Software QA Analyst and has been there for one year.

Sara Harvey, LPN '15 & NUR '16 Sara is working at the University of Vermont Medical Center as a Registered Nurse and has reached her 5th year anniversary!

Tyler Poirier, EET '13, ELM '16 Tyler shared, "I continued working for IBM after graduation, and got married to my wife Ashley in 2018. Got an opportunity to move to Kennebunk, ME in 2019, and now work for Abbott Labs as a Manufacturing Engineer. My kids Coleman and Rhys love their life in Maine and keep life interesting!"

Devon Woods, VET '16 Devon is a certified Veterinary Technician and works at Cape Cod Veterinary Specialists and explained, "I am one of the "lead/seasoned" technicians at my hospitals. I monitor symptoms for anything as simple as mass removal, spaying, neutering, or more complicated symptoms like a leg amputation or foreign body symptom. I am on track to be lead surgery tech in the next few years and maybe even a manager further down the line. I love working with all the different dogs and cats we see and you never have a full day. My favorite part of my day is monitoring symptoms. Even though it is the most complex part of my job I love doing it."

Michelle (Franklin) Austin, PMD '17 Michelle shared that not only did she move, obtain a new job, she also got married at the end of July 2020! One of the first to graduate in the Paramedicine class at Vermont Tech, Michelle is now working at Essex Rescue as a Paramedic.

Josephine "Josie" Green, LPN '16 & NUR '17 Josie shared, "I have been working in med-surg as an RN for 4.5 years now! I am currently pursuing my MSN in education through Western Governors University. And after two back-to-back miscarriages, my husband and I are thrilled to be welcoming a little boy in May 2022!"

Thomas Harvey, LPN '16 & NUR '17 Working at the Vermont Department of Health, Thomas is a Public Health Nurse Supervisor and has been there for 5 years.

Niels Huisman, EET '16 & ELM '17 While studying at the Williston campus, Niels was involved in the Arduino, Maker, and VTC CubeSat Lab Clubs. Now he is currently working at Greensea Systems as a Program Manager and has been there for 5 years.

Katerina Leach, LPN '16 & NUR '17 Katerina is currently working at Caledonia Home Health and Hospice as an RN and has been there for 2 years.

Jordan Mayer, BUS '17 Jordan noted that he enjoyed, "all the great classes with my professors who infused their courses with practical workplace experience." He is currently working at Champlain Cable as an Environmental, Health, and Safety Manager and has celebrated his 5th year anniversary.

Timothy Morris, CET '17 Timothy started working at Chase & Chase Surveyors and has been there for 4 years.

Leo Sprinzen, AET '17 Leo is now working at Vermont Mechanical as a Mechanical Engineer and has been there for 5 years.

Jason Carriveau NUR '18 "After graduating from Vermont Tech with my associate's degree in nursing, I took a year off to work as an RN in the inpatient psychiatry setting as well as home health. I then went to Regis College for three years to obtain my master's degree in nursing and sit for my boards to become

a psychiatric mental health nurse practitioner. I have just recently started a position at Lamoille Health Partners working in the outpatient setting, and love it!"

Katie Colligan, ATT '16, ENT '18, & DPT '18 Katie, lives in Massachusetts and is currently working at First Chrysler Dodge Jeep Ram as an Assistant Parts Manager.

Dian Marie Roy, LPN '13 & NUR '18 Dian has been working at Northeastern Vermont Regional Hospital (NVRH) as a Registered Nurse in the Operating Room for 3.5 years now.

Sandra R. Jacobus, VET '13 & MGR '19 Sandra is currently living in Vermont and has been a Seasonal Christmas Tree Worker at Pineberry Farms for 2 years.

Jacob D. Stone, CSE '19 At Vermont Tech Jacob lived in Nutting and Morey and was involved in the Humans vs. Zombies Club. Now, he is working at Vermont Information Processing as a Software Engineer.

Peter Bartlett, CET '19 & BUS '20 Working as a Project Manager at Weed Precast, Peter has now been there for 3 years.

William Alexander Fretwell, ABT '19 & AET '20 Living in Old Dorm during his time at Vermont Tech, William was also involved with the AIAS, ASHRAE and Ski and Snowboard Build Club. Now he is currently at VHB as a Civil Designer and has been there for 2 years.

John Holleran, MEC '18 & ELM '20 John studied at the Randolph Center campus, lived in Keenan, and was involved with the Astronomy and Christian Fellowship clubs. Now he works at Blue Origin as a Technical Designer.

Brittany Jean Mobbs, LPN '15, NUR '18, & NUR '20 Brittany has been working at NMC as an ICU/Charge Nurse for 3 years now.

Mary Ceglarski Gregg, NUR '18 & NUR '21 Mary is now working at Grace Cottage Hospital as a Charge Nurse and has been employed there for 6 years.

Brandon Hanley, EET '21 Studying at the Williston campus, Brandon noted that the hands-on demonstration was a key component of his learning. Now he is working at Beta Technologies as an Electrical Engineer for the year and stated, "I married my wife, Abigail, on September 25th of 2021. Shortly after

graduating from Vermont Tech, I started work at Beta Technologies. I have been working on the wire harnessing component of the Alia 250 project, and to this date have yet to find anything I dislike about Beta - it's a fantastic company doing a great job in its mission, process, and workplace culture and I highly recommend a tour to anyone interested in electrifying aviation."

Jill Tracy Billiau, LPN '21 & NUR '22 Jill is now at Dartmouth-Hitchcock Medical Center as a Registered Nurse and has been working there for 5 years.

Burton "Burt" DeVeau – Professor, Athletic Director, and Basketball and Baseball Coach in 1949-1950
Edwin Gast – Field Foreman at the Dairy Farm from 1967-1981
Paul Hartmann – Professor in Architectural and Building Engineering Technology Department for 25 years from 1985-2011 (More information related to Paul Hartmann Page 19)
Edgar L. Weber – Part-Time Faculty Member, committed to CEWD (Continuing Education Workforce Development) 1998 - 2022

VERMONT TECH

Francis "Frank" Ettori Jr. EET '91 Frank is the Director of ISO-NE Relations and Power Accounting at VELCO.

Jarrold Harper, EET '91 Jarrold wrote, "When I graduated from VTC with my associates in Electrical and Electronics Engineering Technology degree, I started working for VELCO 3 weeks later. I have been with VELCO for 31 years and have held several positions within the company during that time. Currently, I am a member of the Application Development team focusing on the development of web and mobile applications for our office and field personnel. The degree I earned from VTC really set me up for success in my career and I am thankful every day that I went to VTC!"

Erik Fortin, CPE '98 Erik noted, "Upon graduation from VTC with a degree in Computer Engineering, I began work at VELCO in the Information Technology department and have been at VELCO since (24 years). I had an initial focus

on system administration and computer programming which then branched into database administration and development, enterprise networking, and cyber security. About 10 years ago, I had the opportunity to join VELCO's Telecommunication department to design and build a statewide carrier ethernet network utilizing VELCO's extensive fiber optic infrastructure and newly deployed dense wave network. In addition to Vermont's utility needs, VELCO's carrier ethernet network also provides services that connect NVU's Johnson and Lyndon campuses. VELCO's network reliability requirements and diverse technology portfolio have provided an interesting, engaging, and rewarding experience."

Matthew Smyrski, EET '08 Matthew shared, "I was a graduate in 2008 from VTC with an Associate in Electrical Engineering. VTC was a great school and I loved every part of being a part of the campus and curriculum. I was planning on coming back in the fall of 2008 to

complete a Bachelor's in Sustainability. However, early that summer, my mom told me I should try and apply to CVPS and VELCO. I did and to my surprise, VELCO hired me right away. I have been with VELCO ever since. I did 7 years as a Substation Maintenance Technician and then a System Protection Technician. I would highly recommend that VTC take the time to educate first themselves and then their students on the utility careers that are offered in Vermont."

Tyler Truman, CPM '17 Tyler shared, "In January 2022, I took a new job offer at VELCO as an Access Construction Coordinator, overseeing all aspects of creating new access roads and pads to replace our transmission lines and poles. As well as coordinating and overseeing all of our construction mats and deliveries. After previously being employed at Markowski Excavating overseeing various projects and running heavy equipment."

Gary Santy, ABT '78 Gary is the Senior Principal, Office Leader at the Burlington location, and Operations Manager at Stantec Consulting Services. Starting as the Construction Inspector/Technician, he will now be celebrating 44 years with the company in May of 2022! Gary has recently been awarded 2022 Engineer of the Year by the Vermont Society of Professional Engineers during National Engineers Week!

Michael Fowler, CET '89 In 2017, Michael started working at Stantec Consulting Services as the Senior Transportation Engineer.

Thaddeus "Thad" Luther, CET '94 Thad has been working at Stantec for over 22 years now. His past role includes

being a Project Manager and now he is a Supervisor and Associate in the Transportation Department.

Peter Armata, CET '97 Peter works at Stantec Consulting Services as the Office CAD Leader. When he's not working, Peter is around his family and wife, **Heather Armata, RET '96**.

Lance Biore, ABT '99 & AET '01 Lance started at Stantec over 17 years ago and in the beginning, he started as a Civil Structural Engineer. Over time, with continuous education; receiving his MBA, and obtaining his Professional Engineering License and Project Management Professional Certificate, he eventually became the Principal Business Center Operations Leader for Stantec's U.S. East Energy Division. Lance also mentors a lot of younger staff through project management practices and engineering as he is a licensed practicing engineer. Lance was inducted into Vermont Tech's Athletic Hall of Fame, page. 5.

ALUMNI AWARDS

Congratulations!

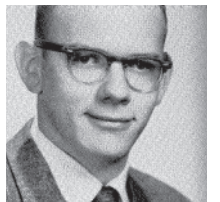

In 2022, the Development and Alumni Relations Office started quarterly E-Newsletters to share news, events, and Vermont State University unification information. To highlight our alumni and their engagement with Vermont Tech, Alumni of the Quarter winners were shared in the E-Newsletters!

Alumni of the Quarter/Year is to highlight, recognize, and honor a Vermont Tech alumnus whose accomplishments and service bring pride to Vermont Tech and the community! Winners received a Vermont Tech Flannel Blanket from Vermont Flannel Co.

ALUMNI OF THE QUARTER

March 2022
Barry Bordner, MEC '74

June 2022
Alan Cox, AG '62

September 2022
Robert Ide, AG '72

ALUMNUS OF THE YEAR

Elisha Mattoon,
VAST '17, MEC '18,
REN '20

He was nominated by, **Gene Sargent, HT '59**, after Homecoming stating, "I feel that he should be recognized for his leadership, concern, and love for people. He directed me and my associate by running around and helping us get around campus. He was thoughtful and kind, and it was much appreciated. After 63 years I think the world of Vermont Tech and I know there is going to be a change, like VATI to VTC, and now VTSU, and I want to thank everyone for working there." (Find Gene's Share Your News on page 12). Elisha was also chosen for his commitment to Vermont Tech by attending multiple events, like the 2022 Homecoming Weekend, and joining the Alumni Association (Page 6)!

24TH ANNUAL SCHOLARSHIP DINNER

After a couple of years of postponing the Scholarship Dinner at Vermont Tech due to the Covid-19 pandemic, we are happy to have one of our largest attended events back on campus! There were two student speakers, Nathan Steil and Ryan Nadeau, who both expressed their personal stories of how scholarships and the collaboration of people help students achieve success in higher education.

BELOW: NATHAN STEIL, A STUDENT IN THE CIVIL AND ENVIRONMENTAL ENGINEERING TECHNOLOGY PROGRAM, NOTED HOW SCHOLARSHIPS HELPED HIM BE MORE A PART OF CAMPUS LIFE AND THE COMMUNITY, EXPLAINING, "WITHOUT THE HARRY WIRTZ SCHOLARSHIP I WOULD NOT HAVE BEEN ABLE TO CUT MY WORK HOURS, AND FOCUS ON EDUCATION, VOLUNTEERING OPPORTUNITIES, LIKE HELPING WITH OPEN HOUSE ON CAMPUS AND BEING A PART OF STUDENT COUNCIL. THE SCHOLARSHIPS DON'T JUST HELP STUDENTS FINANCIALLY, THEY GET COMPOUNDED ACROSS THE COMMUNITY."

ABOVE: PROFESSOR PAUL HARTMANN, 1953-2022.

HELP BUILD A NEW 2023 SCHOLARSHIP AT VERMONT TECH

In Memory of Paul D. Hartmann, the family and friends of former professors Paul Hartmann and Barbara Conrey are pleased to establish a new scholarship fund at Vermont Tech to support students in the Architectural Engineering Technology program called Hartmann and Conrey Scholarship in Architectural Engineering.

This scholarship is given in memory of Paul Hartmann (1953-2022), former Professor and Department Chair. After founding their own architecture firm, Paul and Barbara joined the Architectural Engineering faculty, Paul in 1985 and Barbara in 1995. Paul taught in the department for 26 years and founded Tall Paul's Tall Mall. Barbara taught for 20 years, co-founded the Sustainable Design and Technology program, and created the campus-wide European

SUPPORTING STUDENT DREAMS

NEW SCHOLARSHIPS ESTABLISHED IN 2022

Asher Henderson Memorial Scholarship – Computer and Software Engineering program support in memory of alumnus **Asher, CSE '14 & '16**

Brenda Churchill Flint Memorial Scholarship – Business Management/Business Technology Management program support in memory of alumna **Brenda, BUS '97**

Dick Ethier Scholarship – Civil Engineering Technology, Architectural and Building Engineering Technology, and Construction Management program support in honor of alumnus **Dick, CET '73**

GlobalFoundries Scholarship – Mechanical Engineering Technology (both MEC and MET), Electrical/Electromechanical Engineering, and/or Diesel and Automotive Technology program support. Help created by alumnus **John LaFreniere, EET '87 & BUS '08**, as Deputy Director of Engineering Operations at GF.

ABOVE: STUDENT RYAN NADEAU SHARED PERSONAL STORIES OF HOW SCHOLARSHIPS HAVE TOUCHED HIS LIFE.

Classroom for students to experience art and architecture through travel abroad. Paul and Barbara were drawn to Vermont because of the state's focus on climate and alternative energy; "we offer this scholarship in support of students who will use their skills to help create a more sustainable world."

If you would like to remember Paul or support their mission and commitments to Vermont Tech, please consider donating to the Hartmann and Conrey Scholarship to help further educate and support students in the Architectural Engineering Technology program. With Vermont Tech community help, we can reach the goal of \$10,000 in donations to create an endowment in his honor!

"The scholarships don't just help students financially, they get compounded across the community."

VERMONT TECH CELEBRATES ITS FIRST PROFESSIONAL PILOT TECHNOLOGY PROGRAM SCHOLARSHIP AND WOMEN IN AVIATION INTERNATIONAL CHAPTER

In April, Vermont Tech, in partnership with BETA Technologies and Vermont Flight Academy, launched the first local chapter of Women in Aviation International.

"Women in Aviation International (WAI) is a nonprofit organization dedicated to the encouragement and advancement of women in all aviation and aerospace career fields and interests," states the WAI.org website. The new community provides a professional networking space to all students and graduates of Vermont Tech's Professional Pilot Technology Program (PPT) as well as the broader Vermont aviation community. It is the first such chapter in Vermont and one of few in New England!

"We are excited to open up more opportunities for women looking to pursue a career in the airline industry"

INSET: ELISABETH HOEHN,
VAST '16, PPT '19 PILOTS
THE PLANE ABOVE LAKE
CHAMPLAIN IN BURLINGTON

"We are excited to open up more opportunities for women looking to pursue a career in the airline industry," said Robin Guillian, program director for the Professional Pilot Technology program at Vermont Tech and a former airline pilot. "Now, if you are a Vermont girl into airplanes and you want to fly with a woman, you can find a connection to do that. If you are interested in being a seaplane pilot, you can connect with women who do that. The possibilities for connection are exciting."

WILLIAM FOSBROOK AVIATION SCHOLARSHIP – FIRST PROFESSIONAL PILOT TECHNOLOGY SCHOLARSHIP

The William Fosbrook Aviation Scholarship was left in William "Bill" Fosbrook's bequest to support students in aviation through scholarships. Bill had been involved with the Professional Pilot Technology (PPT) program at Vermont Tech as he was a friend of one of the program's founders, Douglas Smith. He also was connected to the program because of **Stephen Gedney, PPT 2018**. Bill was like a grandfather to Stephen and because aviation was a huge part of his life, Stephen noted, "I wanted to be involved because Bill always provided help, mentorship, and guidance in all facets of his own life, and helping the next generation of aspiring aviators would have been so special to him." After graduation, Stephen spear-headed the William Fosbrook Aviation Scholarship at Vermont Tech.

Stephen was able to attend the Scholarship Dinner and met the student recipients of the new William Fosbrook Aviation Scholarship! "I really enjoyed seeing students strive to be successful in their fields of study, and meeting new aviators, that I was not too long ago." Robin expressed, "I know the pilot program has added expenses for flying time and having a scholarship like this for students will help tremendously!"

Students, Connor Rakiey and Ella Newman, one of the first William Fosbrook Aviation Scholarship recipients expressed, "This scholarship really helps out with paying for my flight fees, and I'm so thankful I received it!" Ella Newman noted, "I have recently passed my

instrument check ride, this scholarship has helped me so much with the cost of the rating. It has helped me take huge steps toward my future career as an airline pilot. I'm so grateful for everything and so thankful for how amazing the aviation community is!"

Now, as a Sponsor for the scholarship, Stephen expressed, "I hope that many of the PPT alum will donate to the William Fosbrook Aviation Scholarship in the coming years. With upwards of 50 graduated individuals since the inception of the program in 2013, I believe we can have a strong return of monetary gifts from these alumni who have all gotten into great careers in aviation!"

ABOVE: FACULTY AND PROGRAM DIRECTOR, ROBIN GULLIAN (LEFT) SMILES AT STEPHEN GEDNEY (BACK TO CAMERA).

Stephen currently is a Corporate Charter Pilot for Northern Illinois Flight Center (N-Jet).

DEAN'S CLUB

Gifts of \$250 to \$499.

CENTURY CLUB

Gifts of \$100 to \$249.

GREEN & WHITE CLUB

Gifts up to \$99.

Vermont Tech regrets any omissions or errors in the listing. Please bring corrections to the attention of the Alumni Relations office at (802) 728-1250 alumni@vtc.edu

Vermont State University Students Have More...

Opportunities

Vermont State University is in touch with our students. Through research opportunities, internships, service learning, and co-op experiences, you will become an even more active and engaged citizen.

Possibilities

The possibilities are endless with our expertise in areas like applied technology, engineering, healthcare, education, business, psychology, climate change science, computer science, and the arts.

Choices

Courses, faculty expertise, and student activities are vast. The enormous variety opens the door to a range of perspectives for you to examine and learn from.

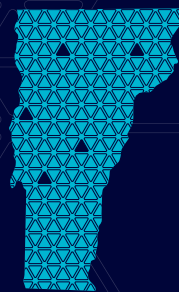

Connections

High-touch, personalized approach to statewide cross-campus collaborations provide you with an incredibly high-quality, comprehensive, and flexible education.

On Campus

Online

Hybrid

5 Primary Locations
With plenty of additional sites across the state that meet students where they are and where they want to be.

Geared for you with undergraduate, graduate, and lifelong learning ranging from in-person to hybrid and online!

*pending approval of the New England Commission of Higher Education
